RANCHERS | LOFTS & TWO STOREY

 **pan-abode®**
THE ORIGINAL

A large, leafy tree with a hammock hanging from its branches. The hammock is striped in brown and white. The tree has dense green foliage, and the background shows a grassy area and a body of water under a blue sky.

"Whether you choose
to build in the forest, in
the country, by the lake,
overlooking the ocean,
or near the city, no other
home brings you closer
to the heart of nature."

Why a Pan-Abode?

Whether you choose to build in the forest, in the country, by the lake, overlooking the ocean, or near the city, no other home brings you closer to the heart of nature.

The difference, quite simply, is Western Red Cedar - a unique variety of wood species common only to North America's Pacific Northwest.

Our indigenous peoples long ago recognized the sacredness of Red Cedar, which they referred to as the "Tree of Life" - as it sustained the mind, body and soul. It is the innate attributes of Western Red Cedar transformed into your Pan-Abode home that make all the difference. They combine to create a living environment that is warm and harmonious while providing dependability and endurance... It is the cedar that connects us to nature.

Flexible, Affordable, and Innovative

We have been designing your homes and building your memories since 1948... a long history that testifies to the enduring Pan-Abode Experience.

Pan-Abode's proven home packages and custom home design provide our customers with a building system that's both flexible and affordable.

If You Can Dream It, We Can Build It

Choose one of our standard floor plans – or use them as inspiration to customize a design that is unique for you.

Our standard home packages contain all materials needed to reach the "lock up" stage of construction – including the floor system, walls, doors, windows, ceiling, and roof system.

***"You won't find a home
that's easier to assemble."***

Building Modern Classics

In 1948, Danish master carpenter Aage Jensen had a dream to manufacture Cedar homes out of the abundance of Western Red Cedar that grew on the coasts of the Pacific Northwest. He partnered with an engineer and technical specialist, Albert “Doc” Steiner, to expand the business internationally. The name Pan-Abode was chosen in tribute to Pan, the Greek god of the wild who was worshipped in natural settings. It was in these fields, groves and wooded glens that everyone could build their retreat away from the pressures and demands of civilization. In the midst of nature’s healing environs, one could re-group, re-connect and start over again.

With the aim of making the Pan-Abode dream affordable and buildable by all families, Mr. Jensen drew upon his knowledge of fine carpentry and his deep understanding of the properties of wood to devise the interlocking building system and “lock joint” corners now synonymous with the Pan-Abode name.

In the years and decades that have followed these humble beginnings, Pan-Abode homes have become a common feature on practically every lakefront throughout North America - thus playing a vital role in the evolution of Cottage and Cabin Culture on this continent. You can find our unique products across Canada, the United States and around the world - including Antarctica.

To celebrate 70 years of building memories in 2018, Pan-Abode decided to introduce a new series of homes inspired by contemporary architecture and design. These contemporary plans have modern, sloped rooflines, expansive use of glass windows and doors, and open-concept interiors.

Today, Pan-Abode International continues to be Canadian-owned and proudly upholds the legacy founded by Aage Jensen and Doc Steiner. As in 1948, our homes continue to be constructed from 100% Western Red Cedar logs, the original wood species that has guaranteed comfort, quality and dependability throughout Pan-Abode’s long history. Pan-Abode is committed to staying true to the original vision of its founding partners to provide every family with enduring memories of their “cabin in the woods” experience – even with contemporary designs!

Huron

A classic Pan-Abode layout updated with modern style. Designed to maximize efficiency, this plan is the quintessential one-bedroom retreat. The living room has the warm feeling of Western Red Cedar, while the open beam ceiling and patio door add a sense of spaciousness. This is your home away from home for all seasons.
